

October 16, 2021

Dear GEM GRAD Lab Attendees:

Welcome to our virtual GRAD Lab hosted by Boston University! We are pleased to have you with us today to learn about graduate school opportunities for students in the STEM fields. We hope this event will be of service to you as you make plans to continue your education in the Boston/Cambridge areas or elsewhere.

We hope this will be an opportunity for you to learn about graduate school in general and about our partner schools in particular. Representatives from many prestigious institutions are participating today to provide you with an overview of the wonderful opportunities available and to answer your questions.

Graduate school is an exciting time in your life and increasingly important for career SUCCESS. Make the most of today – use the information provided in these sessions to develop a plan of action, and follow through. The GEM GRAD Lab is designed to be an active learning experience: the facilitators, presenters, and panelists will provide you with information, but they will also expect you to participate in activities and ask questions. We are here to help you stay focused on and committed to your goals; if you find yourself struggling with the application process, seek out campus resources and reach out to mentors to get back on track! When you leave today, we hope you will be on the road to a successful graduate school application.

Best wishes for a very successful future in the STEM fields and congratulations on making the decision to attend our GEM GRAD Lab. We are so pleased to have you with us today.

Best regards,

The MC-STEMP Partners
